

9:00 - 12:00 - FSDI 105 Session #2 Cohort 27

- Study the selectors (id, class, tagName).
- localStorage uses functions ***setItem(key,value)*** and ***getItem(key)***
- the localStorage only supports strings we used ***JSON.stringify()***

Extra HW:

- study arrays
- add the password validation (at least the user should enter 6 characters use the ***length***)
